International trade	6 to 10 Marks	12.40 PM to 2.15 PM
Money market	6 to 12 Marks	3.00 PM to 5.00 PM
Indian economy	4 to 12 Marks	5.30 PM to 7.25 PM
Nature and Scope of Business Economics	5 to 8 Marks	7.45 PM to 9.40 PM

<b>Exam Day</b>		
Any topic Left		6.30 AM to 8.30 AM
Your Mistakes (in test paper or in practice)		9.15 AM to 10.30 AM

## Tips

1. Revise the notes and questions you have personally prepared and marked as important. These will contain your own understanding and common mistakes to watch out for
2. On the exam day, spend the first 2.5 hours revising any remaining topics and your own notes. Then, spend the next 1.5 hours solving questions you are most confident about
3. If you get stuck on a question, move on to the next one. You can always come back to it later if time permits
4. In the final hours before the exam, stay calm and avoid discussing the paper with others. This will prevent any negative thoughts from creeping in
5. While solving questions, maintain proper referencing between the question paper and your answer sheet. Mark the book page number where the solution is given and vice versa. This will save a lot of time during revision
6. In MCQ Papers, Attempt 40 questions in the first hour (2:00-3:00) to ensure you pass the examination. Use the next hour (3:00-4:00) to attempt extra questions that you can work out in detail.
7. Stay positive and remember that even if you haven't prepared everything, you can still score well by attempting what you know thoroughly.
8. Dedicate maximum time to practicing question solving from previous year papers, study materials and mock tests. This will boost your speed and accuracy.
9. Divide your remaining time optimally between revisions and practice based on your strengths and weaknesses in each subject.
10. After every 1-1.5 hours of study, take a 10-15 minute break to rejuvenate your mind. But avoid long breaks.
11. Get sufficient sleep of at least 6-7 hours daily to avoid mental exhaustion during the exam.
12. Read the exam instructions carefully. Plan which questions to attempt first based on difficulty level and time required.
